Emerson Electric Flight Operations Internship

This is a full-time paid internship that will last 8 weeks during the summer of 2019.

The internship will begin with a tour and overview of Emerson’s Corporate Headquarters. The intern will then report to the Emerson Hangar at the Spirit of St. Louis Airport for an orientation and overview of the flight department where the intern will be introduced to and trained on the various software, programs, and documents that are utilized in day to day operations. This includes aircraft & crew scheduling, flight planning, Safety Management System, and standards. The candidate will then work alongside their pilot supervisor and with scheduling & international dispatch administrators to assist in domestic and international trip planning tasks. At various times during the internship, the intern will have opportunities to join a flight crew and observe flights from the jump seat on Emerson aircraft. The intern will also be provided other various training opportunities. The internship will conclude with the candidate having gained the necessary knowledge to completely plan and organize a mock international trip. The mock trip will be reviewed by the scheduling & international dispatch administrators and the intern’s supervisor for completeness and accuracy.

Please direct any questions to Ms. Nicole Lankist. Her e-mail address is Nicole.lankist@emerson.com. Please include the term “Aviation Internship” in the e-mail’s subject field.
