United is hiring Flight Operations Interns

The United Airlines Flight Operations Intern Program (FOIP) is designed to give enrolled students insight and exposure into the operation of a global airline. The FOIP combines a student’s academic and career interests with valuable work experience in the commercial air carrier environment. During the internship the student will be assigned a mentor to work with who is responsible for monitoring their progress throughout the semester. The mentor will be responsible for assigning tasks, special projects and directing the intern on a daily basis. Throughout the course of the FOIP, the responsibility of the interns will not only encompass their respective base and office, but there may also be opportunities to travel to other cities within our network on business trips and off site visits. Internships are offered in the various Flight Operations departments and various cities.
