

SIU Aviation Technologies Safety/Hazard Report

Hazard Reports help to efficiently identify hazards that **cannot be immediately resolved** within the Aviation Technologies operation areas.

Hazard Reports should be filed if:

You notice a possible hazard such as; equipment / engine fluids on the floor, aircraft jacked but not properly roped off, piece of equipment not properly secure, etc...

There are no repercussions for submitting a Hazard Report.

1) When did you find this potential hazard? ____/____/____

2) Where was the possible hazard found? (Circle One)
